

SUNRISE RESOURCES plc

(“the Company”)

AIM Announcement

16 December 2024

CS PROJECT BULK SAMPLE – CUSTOMER TRIALS

Further to its announcement of 5 December 2024, the Company is pleased to announce that it has now completed the mining and shipping of a 20-ton bulk sample from its CS Natural Pozzolan Project located in south central Nevada, USA.

The sample has been provided to an established industrial minerals company which is considering use of our natural pozzolan as a beneficial additive to their cementitious materials range following a programme of successful laboratory based testing. The bulk sample will be milled and mixed with other cementitious materials to produce a blended material for customer evaluation.

The CS Project is “mine-ready” with key operating permits already in place covering 14.5 million tons of pozzolan and 1.3 million tons of perlite. An additional area, the Northeast Zone, presents a large additional target with surface dimensions of 1.3km by 0.6km with a drilled thickness of over 40m from surface.
